DAVID KIM

Backend & Database Engineer

Contact: david.kim@email.com | +82 10 1234 5678 | Seoul, South Korea

PROFESSIONAL SUMMARY

Database architect and backend engineer with deep expertise in high-performance systems. Specialized in distributed databases, query optimization, and data engineering pipelines.

TECHNICAL SKILLS

- **Languages:** Python, Java, Go, SQL
- **Databases:** PostgreSQL, MySQL, Cassandra, Redis, Neo4j
- **Backend:** Spring Boot, FastAPI, gRPC, Kafka
- **Data Engineering:** Apache Airflow, dbt, Spark, Flink
- **Performance:** Query optimization, indexing strategies, caching

PROFESSIONAL EXPERIENCE

Senior Database Engineer | DataSystems KR | 2019-2024

- **Architected distributed database handling 1M+ transactions/second**
- **Optimized complex queries reducing response time by 75%**
- **Implemented data lake with Apache Spark and Delta Lake**

Backend Developer | TechStartup Seoul | 2016-2019

- **Built real-time streaming pipelines processing 10TB daily**
- **Designed event-driven architecture using Kafka and RabbitMQ**
- **Migrated legacy systems to microservices on Kubernetes**

EDUCATION

BSc Computer Engineering | Seoul National University | 2016
